

Koncept-Informatyka Sp. z o.o. dedication to quality and innovation is a true differentiator in the software industry. Vektor Software relies on Koncept-Informatyka on the most critical software development projects. The delivery of quality code on time and on budget with predictability is a key sustaining factor of this long-term relationship.

Koncept-Informatyka has helped Vektor Software to work on following projects:

Reporting Engine for Marriott International – Java and Adobe PDF technology project that allows for generation of sophisticated PDF reports from the variety of ERP systems. Koncept-Informatyka provided software development and resolved many challenging issues while staying on time and on budget for this highly complex project.

FleetAnswers Niche Social Network – Koncept-Informatyka was tasked with the software development of niche social network for fleet and transportation industry. The solution has attracted many key organizations such as: Coca-Cola, General Motors, PwC, Hewlett-Packard, Pfizer and many others. The project involved creating this platform based on variety of open source technologies, and expanding them to efficiently deliver functionality.

Utilimarc – Koncept-Informatyka developed a data analytics system for fleet industry. The solution allows for complex benchmarking of industry and company data and allows participating organizations to improve their operational models. The clients utilizing this system range from USA Federal and Municipal Agencies, to Fortune 500 companies and Energy Industry.

Advocate Interactive – Koncept-Informatyka developed cutting edge Facebook Application that is utilized on the US market. The application allows for contacting Federal, State and Local politicians by leveraging Facebook platform. This platform has attracted variety of large non-profit organizations with global reach (such as Habitat for Humanity) and variety of American Universities.
